

2018 Arctic Cat® ZR 6000 SNO PRO ES (137)

Enumclaw, WA 98022

47.2047793, -121.9916371

Let us know you found this listing on PowerSportClassifieds.com! 2018 Arctic Cat ZR 6000 SNO PRO ES (137) LOW MILE PRE-OWNED! SAVE OVER \$3K VS NEW! SEE IT ON OUR SHOWROOM FLOOR! Features may include:

- NEXT-GEN BODY PANELS Arctic Cats Next-Gen body panels are designed to seamlessly cut through the air with as little atmospheric tension as possible. With only a quarter-turn of the two quick-release tabs, the side panel comes off and provides easy access to the engine compartment for general maintenance.
- 6000 C-TEC2 ENGINE WITH DSI This 599cc 2-stroke DSI is the unmodified version of the engine that's been launching Team Arctic down the racetrack since 2012. This quick-revving, 125-class horsepower C-TEC2 power mill is the product of a world-class engine assembly plant ours. Whether you're riding a ZR, an M, or a Crossover, the 6000 is one of the most satisfying engines found in a snowmobile.
- ARCTIC DRIVE SYSTEM WITH TEAM RAPID RESPONSE II DRIVE AND TEAM RAPID REACTION BOSS DRIVEN CLUTCH The Arctic Drive System features a lightweight magnesium chaincase. The new TEAM Rapid Response II drive clutch features an auto-adjusting belt tension design that delivers consistent performance without manual adjustments. It also features a 12.5% lower effective starting ratio while maintaining the top ratio for smoother engagement and reduced belt wear at drive-away speed.
- ARCTIC RACE FRONT SUSPENSION WITH FOX 1.5 ZERO RC SHOCKS The Arctic Race front suspension geometry was developed through racing. Our unique wide A-arm spacing complements the chassis design, which allows us to maintain a tighter suspension. FOX 1.5 ZERO RC shocks come with a 1.5" diameter body and feature coil-over springs for maximum small bump compliance while maintaining big bump control. They are compression and rebound adjustable for easy tuning in varying conditions.
- SLIDE-ACTION REAR SUSPENSION WITH ARCTIC CAT TWIN TUBE SHOCKS The SLIDE-ACTION Rear Suspension brings race-day technology to everyday riding. Our U-shaped slot fits over a fixed shaft to allow a crucial half-inch of sliding movement. As the rear transfer blocks are engaged, the free-acting front arm follows the terrain, keeping your skis firmly planted over bumps, and during aggressive cornering and acceleration. This significant detail controls ski lift during acceleration. The Arctic Cat hydraulic twin tube shocks smooth out the chatter, mile after mile for an even more comfortable ride.
- DELUXE DIGITAL GAUGE This dual configurable LCD screen gauge allows you to check all the vital information about your snowmobile and more. 14 different readings to be exact. There's an odometer, speedometer, max RPM, 2 trip meters, engine hours, low oil light, coolant temperature, exhaust temperature, intake air temperature, battery voltage, fuel level, clock and reverse indicator.
- 12V OUTLET Need to charge your phone or another electrical device? We've got you covered. Just plug in and power up while you ride.
- ELECTRIC START This is just the thing for consistent, reliable starting. A simple

turn of the key is all you need to get up and running. □HAND & THUMB WARMERS Say goodbye to cold hands. Our hand and thumb warmers provide plenty of warmth and comfort on long rides. □129-IN. RIPSAW & 137-IN. RIPSAW II TRACK WITH 1.25-IN. LUGS Just say the name Ripsaw and one of the best trail tracks out there comes to mind. The 15 wide footprint with 1.25 lugs provide excellent durability and traction on groomed or hard-pack snow. Standard Ripsaw is available in 129" or the Ripsaw II is available in 137". □ADJUSTABLE HANDLEBAR WITH 5.5-IN. RISER Our easily adjustable handlebar allows you to set the perfect position for riding comfort.
